

## **Radiation Safety Officer (RSO)**

### **Job Summary**

We are looking for a Radiation Safety Officer (RSO) to join our team in Sweetwater, Texas! The Radiation Safety Officer Advises senior leadership on strategies and tactics relating to the technical and regulatory direction of the radiation safety program. Develops, plans, coordinates, and manages radiation safety programs, including the implementation of those programs, to ensure the safety of employees, clients, and visitors. Ensures radiation safety program compliance with applicable company policies and local, state, and federal regulations. Serves as primary contact for company inspections and all other regulators.

### **Duties / Responsibilities**

- Oversees all facets of the daily operations of the company ensuring compliance with state, and federal laws, policies, and regulations.
- Prepares reports and other forms of scientific or technical nature, including publishing and revising the company's Radiation Safety Manual and SOP's as appropriate and performs an annual audit of the Radiation Safety Program.
- Responds to radiation safety emergencies and carries 24-hour contact phone.
- Oversees the use of radioactive materials at the company's facilities through the management of radioactive materials licensing, radiation laboratory survey, and radioactive waste management programs. Reviews and approves requests for radiation permits.
- Manages the radiation safety training program to ensure that only authorized, qualified individuals work with radiation; manages the personnel dosimetry program to limit radiation exposure to radiation users and ensure compliance with company policies and regulatory exposure limits.
- Performs miscellaneous job-related duties as assigned.

### **Required Skills / Abilities**

- Bachelor's or graduate degree in physical science or engineering or biological science with a minimum of 20 college credits in physical science; prefer at least 5 years of professional experience in health physics including at least 3 years in applied health physics.

### **Job Requirements**

- Possession of a valid Texas driver's license is a requirement for this job.
- Willingness to travel as necessary
- Work environment may involve exposure to potentially dangerous materials and situations that require following extensive safety precautions and may include the use of protective equipment.
- Light physical effort. Requires handling of average-weight objects up to 10 pounds or some standing or walking.

### **Compensation / Benefits**

- Salary is dependent upon experience
- Health Insurance
- Dental Insurance
- Vision Insurance
- Life Insurance
- 401(k) Retirement Plan
- Cafeteria Plan
- Paid Time Off
